

ELEVATE YOUR EVENT

From set changes to increased lighting options to special effects, rigging raises the possibilities. As the exclusive rigging provider at the Fairmont Orchid Hawaii, PSAV® is delighted to partner with you to develop a safe, effective solution that enhances the experience.

PSAV's ETCP-certified rigging specialists will optimize the impact of audiovisual and event technology for your event space and maximize your desired results. By suspending your speakers, lighting and other specialty equipment, your audience will enjoy an unobstructed view of your presenter, staging elements and unique set design.

Dramatically enhance the overall experience with rigging, providing:

- Clear sight lines for the audience
- Cleaner and more sophisticated show appearance
- Enriched stage presence and visibility of those on stage
- Increased floor space for additional exhibitors and attendees
- Improved overall audio quality

With proper rigging, PSAV will ensure your event stands out — not the AV equipment. Contact us today to learn more about how rigging can elevate your event.
